**NOTE: CONTRACT HAS BEEN EXTENDED THROUGH 11/30/99**

---

REMIT TO: 47770C-B Micron Government Computer Systems, Inc.  
P.O. Box 94170  
Chicago, IL 60690

THIS IS A MULTIPLE AWARD CONTRACT. USERS MUST REVIEW ALL THE FOLLOWING CONTRACTS FOR OPTIMAL PRICING, DELIVERY AND SERVICE: MA574, MA575, MA970, AND MA971, AND DOCUMENT PURCHASING SELECTION.

This contract covers only those items listed in the price schedule. It is the responsibility of the agency to ensure that other items purchased are invoiced separately. State agencies will place orders directly with the vendor (creating a PG in Finet) and make payments for the same on a PV referencing the original PG. Agencies will return to the vendor any invoice which reflects incorrect pricing.

**WARRANTY (INCLUDING YEAR 2000)**

Micron Electronics has taken exception to the State of Utah's Warranty (including Year 2000) contract clause. Users of this contract should be aware of potential risks. The following is Micron's statement concerning Year 2000 product compliance:

**SUMMARY**

Micron Electronics and NetFRAME computers sold on or after August 26, 1996, are "Year 2000 Compliant," as defined below. These computers have either passed a Year 2000 compliance test developed by NSTL, the results of which may be reviewed at [http://www.nstl.com/html/micron\\_y2k\\_compliant.html](http://www.nstl.com/html/micron_y2k_compliant.html), or were self-certified by Micron to be Year 2000 Compliant. Please visit Micron's web site at <http://www.micronpc.com/about/year2000> for updated postings on ongoing Year 2000 testing.

You need to test your Micron computer for Year 2000 compliance within 90 days after you first bought it or within 90 days after you receive this letter. For help with this, please go to the NSTL web site where you may download the free YMark2000 test software which will automatically check your machine for Year 2000 compliance. The URL is [http://www.nstl.com/html/ymark\\_2000.html](http://www.nstl.com/html/ymark_2000.html). If your Micron computer is not Year 2000 compliant, as defined below, Micron will, at no cost to you, either (1) help you manually change the system date in the CMOS setup program; (2) replace the BIOS; or (3) give you a date utility software program that will automatically update the system BIOS settings.

This is just a Summary. Please read the DETAILS section below for the full Micron Electronics' Year 2000 Compliance Statement and Limited Warranty.

**DETAILS**

Micron Electronics, Inc., and its wholly owned subsidiaries (hereinafter collectively "MEI") warrant that computers sold on or after August 26, 1996, by MEI or NetFRAME Systems Incorporated (hereinafter computers sold by either entity are referred to collectively as "MEI computer") are "Year 2000 Compliant." "Year 2000 Compliant" is defined to mean that each MEI computer sold on or after August 26, 1996, shall accurately process date data (including, but not limited to, calculating, comparing, and sequencing) from, into and between the twentieth and twenty first centuries, including leap year calculations, when used in accordance with the product documentation provided by MEI, provided that all software and firmware, including BIOS, accompanying or used in combination with the MEI computer(s) properly exchange date data with the computer(s). Many MEI computers have passed a Year 2000 compliance test developed by NSTL, and those results may be reviewed at NSTL's web site. The address is [http://www.nstl.com/html/micron\\_y2k\\_compliant.html](http://www.nstl.com/html/micron_y2k_compliant.html). Some MEI computers, however, are not compatible with NSTL testing protocols, so those machines were self-certified by MEI to be Year 2000 Compliant using a different testing procedure. MEI encourages you to visit <http://www.micronpc.com/about/year2000> for additional information.

To the extent any firmware or software accompanying any MEI computer (including those first sold by MEI or its precursor entity Zeos International, Inc. before August 26, 1996) at the time of shipment from an MEI facility does not properly exchange date data with the computer, MEI, without warranting the performance of the firmware or software, agrees to pass through to the consumer any Year 2000 warranty MEI has received or will receive from its upstream software vendor/licensor to the fullest extent possible, and in any event, MEI will, in its sole discretion and at its expense, either (i) assist the customer to manually change the system date in the CMOS setup program; (ii) replace the BIOS; or (iii) provide a date utility software program to the consumer that will automatically update the system BIOS settings. For any such remedy, the manner of providing the remedy to the consumer, i.e., phone support, Web site download, diskette mailer, etc., shall be determined by MEI. Any non-compliance must be discovered and made known to MEI in writing within ninety (90) days after initial purchase or within ninety (90) days after your receipt of this letter. Customers acknowledge it is ultimately their responsibility to perform whatever additional levels of Year 2000 testing as may be appropriate for their system, given their particular configuration and peripherals.

MEI makes no representations or warranties concerning MEI computer configurations which are in any way altered or modified in terms of their date-recognition functionality after any such system physically leaves MEI's facilities. MEI makes no other warranties, either express or implied, with respect to MEI computer systems' Year 2000 compliance other than those set forth herein. ALL OTHER WARRANTIES RELATING TO MEI COMPUTER SYSTEMS' YEAR 2000 COMPLIANCE, EXCEPT THOSE STATED IN MEI'S STANDARD LIMITED WARRANTY ACCOMPANYING ITS COMPUTER SYSTEM(S), ARE HEREBY DISCLAIMED.

Any dispute or litigation related to the Year 2000 will be interpreted according to the laws of the State of Idaho and shall be prosecuted or defended in the state or federal courts of the state of Idaho.

**MICRON'S YEAR 2000 COMPLIANCE CLARIFICATION**

We have received letters from many of our software and firmware vendors suggesting that their products are Year 2000 compliant, but some will not warrant that fact. To the extent that we have received warranties from our upstream software and firmware vendors, we will pass those warranties on to you. Therefore, Micron cannot warrant that all software and firmware that we pass along to you will be Year 2000 compliant. Please reference the attached Micron Year 2000 Compliance Statement and our website at <http://www.micronpc.com/about/year2000>.

**ORDERING INFORMATION**

FAX NUMBER FOR ORDERS: (208) 893-7479

**NAMES OF PERSONS RESPONSIBLE FOR TAKING ORDERS:**

SCOTT WILHELMI (888)652-6730 X 31447

BRIAN THORNBERG (888)652-6730 X 34587
